Samsung health watch active 2

www.bnn.in.th Wwww.bnn.in.th is also using a security service to protect against online attacks. Samsung Galaxy Watch Active2 is another portable device in the form of a smartwatch using Samsung's Tizen system. Let's do it all. There is no limit to the system mark or limit. This makes it impossible for users to use the same mobile brand. To put it, the Samsung Galaxy Watch Active2 is designed to be one. While the smartwatch provides a more agile assistant for smartphone users every day. It will warn you of a lot of things from your smartphone and a remote control, and is also a fitness tracker because it has sensors and the ability to exercise and take care of your health at a premium level. The device inside the box has a separate package and cable, and a wireless charger. in the market, using simplicity. It's fashionable to bring in any opportunity. Wear it on a light day, or you can wear it all in a nice dress. Well designed. Make it easy to customize with today's most stylish watch face. Watch Active2 is available in two sizes in Thailand, 40mm and 44mm. There are models that come with leather straps and stainless steel straps. As for wireless connectivity technology, there is a wide range of bluetooth and Wi-Fi connectivity technologies, as well as special editions that support eSim activation for 4G internet connection at any time without wi-fi or smartphone connection when you need access to the functions that require the internet itself. The entire range of sensors on the watch provide a top-notch fitness tracker because it includes accelerometer, Barro's Sensor, Gyro's Sensor, Light Sensor with HR Sensor or Dust Detector, and built-in pre-built memory for installing apps or storing video and music files, 4GB point size of the Galaxy Watch Active2 has the ability to play music and open images directly from your own memory , and you can connect to headphones to listen to music without a smartphone near the screen. The cover of the song being played can be clearly displayed. Like opening a song on Youtube Music, Spotify can also access the music cover from within the app, including a full contact page when a call arrives. And the Active2 watch has a built-in microphone and speakers, so it can be moved directly through the Watch Active2 watch. The end of the line doesn't bother you, because the Watch Active2 system has many capabilities that can be done as a smartphone, with two buttons, which are mainly start and back buttons. It can be used to press and use the app integration page to turn it off. The top

case is a touch-enabled screen. The image is very nice. The 360 x 360 resolution is a Super AMOLED display with high scratch-resistant glass DX+ gorilla corning. It has enough brightness to see the image even in daylight. Wide angle, clear image The high intensity display for the Active2 watch in the case of the Galaxy Watch Active2 is more special than any other smartwatch on the market because it is the first to have an LED sensor used to detect up to 8 pulses. Most devices at the 8 dots are still using 2-4 point sensors. The assembly supports waterproofing 5ATM or a meter that we can take to swim and exercise. The MIL-STD-810G military resistance standard uses a wireless charging system with its dedicated charging dock in the box, and of course it must be used with Samsung's Wireless PowerShare wireless charging system smartphone that can be used on the back of a smartphone to charge the device. The generous thing about Samsung smartwatches is the use of a standard watch strap that we can replace with a typical watch band. The watch is well equipped to support life, such as cinema mode, which turns off lights and notifications so that our watch doesn't interfere with the next person, and there's also a mode without interference for workday or rest, and anti humidifiers. To swim, you can not touch accidentally from contact with water. It's a great place to stay. The Galaxy Watch Active2 has a lot to do with the fact that it's a lot of things to do, including installing apps directly from the clock. The main function is the device to detect movement, display and control, as the capabilities and settings are much more convenient to manage in the Galaxy Wearable app on your smartphone. The Galaxy Watch Active 2 is also one of the devices that will be managed through this app. In the Galaxy Wearable app, we'll find all active galaxy watch2 settings, including aesthetic customization, because Tizen is a system with thousands of watch faces to choose from. Each of them is very nice. It is the smartwatch system with the widest selection of clock faces, and is the most beautiful ^.^, adjusting the settings for many other applications. Both notification tasks will be displayed on our clock screen. To see which apps can be notified on our watch, including notification times and don't disturb schedules. We can transfer music or image files that are on your smartphone to your watch from this app. We can set many values for the Galaxy Watch Active2 on the tizen system, and we can also install additional apps in addition to the watch face. Apps are also available in the Galaxy Store, which is also linked to the Galaxy Wearable app page. There are many interesting apps, such as the camera controller app, the camera control app for smartphones with your watch face. It allows us to view images from the front of the camera in real time and operate the camera remotely as a remote application, voice recorder, a quick voice recorder application that can use the clock to record audio, Samsung Internet For Galaxy Watch, or a web browser that can work on the clock screen , or Player4Youtube which can also watch Youtube on your watch. This allows us to temporarily use the watch instead of the smartphone screen in case of temporary need. There are also important apps for athletes and fitness enthusiasts like The Run With Map My Run app, a runner-up app that loves Under Armour's systems and products, and the Strava app to help record workouts, walking, running and cycling, there are many apps in the Tizen system for us to use ^.^ With the Galaxy Watch Active2 hitting a wide range of motion sensors and a heart pulse, you can track your fitness and life every day in great detail. Samsung has another major app, Samsung Health, which will provide the watch tracking information and register it. Samsung Health is the center of our body movement. Whether walking, walking, The Galaxy Watch Active2 will automatically record our lives and distinguish them with the algorithms and sensors they have, and in the Watch Active2 version, Samsung has improved its accuracy in terms of hardware and software. From the test, the sleep timer is perfect and can detect 7 basic exercise activities. On foot, running, cycling, rowing, swimming, elliptic trainers and more than 80 other types of exercises can be opened from the app, each of which is designed to be properly recorded. It's called almost every activity that people in the world. The Samsung Health app is also full of fitness guides. It includes strengthening the body, strengthening muscles, as well as meditation and mental determination, as well as improving sleep quality and slimming programs, all of which are personal trainers who control and recommend exercise patterns. The right thing to walk, run, suitable for us in real time so that users can achieve their goals on multiple levels. You can choose from these world-based training programs for free. With its beautiful watch performance, there is a wide range of sensors, high quality displays and software from Samsung and its partners. Make the use of the galaxy watch active2 very wide. A full house. It ends up as a smartwatch, a smartphone assistant and a fitness device that helps people in health. The benefits are really high, if you look at weaknesses, it's about using batteries. If the battery is 100% full, it can be used in a full smartwatch for about 3 days per charge. The price of the Samsung Watch Active2 and details can be found on Samsung's website.
